Ethiopian

## Professional Experience

### Full-Stack Developer, Freelance Experience

2023 | Addis Ababa

Full-Stack Developer with experience designing, developing, and deploying responsive web applications using React, Node.js, RESTful APIs, and SQL/NoSQL databases. Worked as a **freelance developer**, delivering end-to-end solutions including frontend UI development, backend logic, database integration, authentication, and deployment. Collaborated with clients to gather requirements, optimize application performance, fix bugs, and ensure scalable, secure, and maintainable code while meeting project deadlines

## Languages

English

Amharic

## Skills

### Frontend

HTML5, CSS3, JavaScript (ES6+), React.js, Bootstrap, Tailwind CSS, EJS

### Databases

MySQL, MongoDB, SQL, NoSQL

### Other Tools & Platforms

Postman, VS Code, npm, Linux/Windows

### Soft Skills

Problem-solving, project management, communication, client collaboration, teamwork

### Data Analysis

Experienced in analyzing and manipulating datasets using **Pandas** and **NumPy**, including data cleaning, transformation, statistical analysis, and visualization to extract meaningful insights.

### Backend

Node.js, Express.js, RESTful APIs

### Version Control

Git, GitHub

### Deployment & Hosting

heroku, Render, Heroku, Netlify

### python developer

Results-driven developer with strong experience in building scalable applications using Python. Skilled in writing clean, efficient, and maintainable code, developing RESTful APIs, and working with databases. Experienced in debugging, performance optimization, and collaborating in agile environments to deliver high-quality software solutions.

### TypeScript

Results-driven developer with strong experience in building scalable and maintainable web applications using TypeScript. Skilled in developing type-safe frontend and backend solutions, creating RESTful APIs, and integrating modern frameworks

## Projects

### Abushe Real Estate – Full Stack MERN Application, Real Estate

2021 – 2021

comprehensive full-stack real estate marketplace built to manage property listings, user profiles, searching, filtering, and user-landlord interactions in Ethiopia.

**Live Demo:** [abushe-real-state.netlify.app](https://abushe-real-state.netlify.app) ↗

**Dessie Movie Center**, *Movie Streaming App*

A frontend movie discovery and streaming-style app with a responsive UI, integrated with TMDB API to pull movie data.

**Live Site:** [dessiemoviecenter.netlify.app](https://dessiemoviecenter.netlify.app) 

**DessieMart**, *E-commerce Web Application*

- A modern e-commerce demo app demonstrating product catalogs, functional cart systems, and real-time calculation features.
- **Tech Stack:** React.js, Node.js, Express.js, MongoDB
- **Live Site:** [dessiemart.netlify.app](https://dessiemart.netlify.app) 

**MAM Restaurant**, *Digital Menu & Ordering System*

A restaurant management system with a digital menu, easy online ordering for customers, and an admin dashboard for efficient operations.

**Live Demo:** [mam-restaurant.netlify.app](https://mam-restaurant.netlify.app) 

## Profile

Full-stack developer with 3 years of hands-on experience building web applications using modern technologies such as React, Node.js, REST APIs, and databases. **I graduated from Arba Minch University**, where I developed strong technical foundations in software development, algorithms, and system design. In addition to my academic background, I have gained real-world experience working as a freelance developer on independent projects, delivering scalable and user-focused solutions.

Alongside full-stack development, I work as a Python developer with practical experience in data analysis using tools such as Pandas and NumPy to extract insights and solve real-world problems. As a graduate of Arba Minch University, I continuously improve my skills through hands-on development, problem-solving, and building portfolio projects that demonstrate both technical depth and practical application.
